

I dont think it would harm any one in  
the process of expanding the stations rights  
bother any others.

If they dont like the

freedom of having a few FREE FM radio  
stations in there nieghborhood,

Why would they care about what others think?

I think it would be the best to extend  
the broadcasting of the stations  
throughout the Low frequency FM stations.

I dont think the clearer channels should  
have as much rights as any other broadcaster  
in the low FM stations To Be clearer than other  
stations. We should all have equal rights to the  
frequencies throughout the neighboring cities of  
that specific radio station.

The communities of the radio stations  
should all be connected to have equal rights.

We should be able to get the local news on the way  
to work by a switch of a button, just by tuning  
to you favorite station.

Finally: I Think you should be able to be heard through  
voice airwaves, I think that it should  
be legal to have your voice on air with  
your agreement.

I ask to have more information about the  
Legal rights of stations and the restrictions,

Thank You,

Leo Ashcraft the 3rd
